

Mohair Tape Installation Instructions

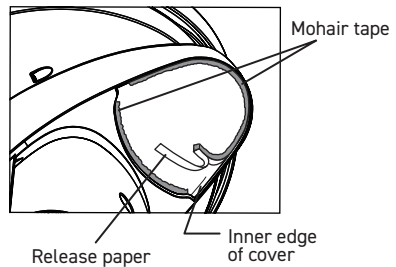

- This part reduces the resistance between the shower hose and the resin cover, and makes the handling of the shower head smoother.

How to attach

- (1) Wipe off any dirt such as water, dust, or oil on the part where the trap cover is attached (figure  shown on the right).
- (2) While peeling off the release paper, attach it to the inner edge of the cover.
- (3) Hold the entire cover so that the adhesive adheres firmly to the inside of the cover.

How to remove

- Peel the base end of the tape and then slowly peel it off.

Caution

- If you touch or reattach the adhesive surface, the adhesive will become weaker.
- If the tape becomes dirty, apply a neutral detergent diluted with water to a brush, etc., and wash it with water to clean it.
- Do not use for any other purpose, such as sticking it on your skin.
- Please keep it out of the reach of children and out of direct sunlight.

- Tape is a consumable item (not covered by warranty).
- If the tape comes off, please contact your local Takara Belmont dealer.
- At local stores, you can purchase mohair tape which covers gaps between doors and sliding doors.
