Roller Ball F FAR-INFRARED HAIR PROCESSOR

The Roller Ball F series has become an iconic product in many hairdressing salons around the world, since its launch in 1989. In memory of our 100th Year Anniversary, the creation of 2 new colours, elegant Champagne gold and noble Brown, will add a luxury feel to your salon space.

High efficiency carbon heater. The fastest yet, with easy-to-use distribution and temperature control.

● Distribute the heat only to the parts required by treatment

Using the controls – select/deselect areas (front, side, nape) to control the specific area you would like developed whilst the ring rotates. The Roller Ball F can effectively distribute heat to a large amount of hair and deeper penetrates hair which may be resistant to treatments.

● Processes colour and perms in a shorter time

- The time to reach the target temperature is about half that of our conventional ceramic heaters
- Processes colour and perms after a short time of exposure

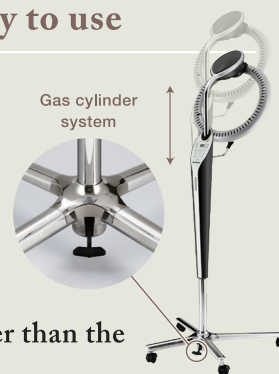

Reaching the target temperature reduced by about 2 minutes.*

* Compared with our conventional products

Light-weight and easy to use

● Easy setting with smooth height adjustment

- Adapt to each client with smooth height adjustment
- A gas cylinder is used to assist in raising the height of the unit. Press on the foot pedal for effortless control

● Approximately 30% lighter than the conventional model

Easy-to-use casters increase mobility

- Easy care which prevents hair becoming tangled
- Smooth, rotatable casters
